Step into the skin of a wild wolf. Theory of the neutral soliton in a dipolar Bose-Einstein condensate. We show that nonlinear excitations, named solitons, exist in dipolar Bose-Einstein condensates, in the absence of a magnetic field and when the dipole moments are not aligned with the longitudinal field. Using a mean-field theory based on the coupled Gross-Pitaevskii equations and a variational ansatz, we obtain exact analytical expressions for the corresponding wave function and the numerical solutions of the coupled Gross-Pitaevskii equations in a harmonic trap. The excitation is stable, in the sense that it represents the ground state of a certain excitation branch. Its dynamics presents a shape oscillation followed by an emission of radiation, a phenomenon that should be testable in experiments. Q: Formatting TIME in Flex Text Field? I'm trying to create a simple form with a text field that contains only TIME (hh:mm:ss) values. I would like it to display in this format: 0:00:00 07:00:00 (the times are entered as Dawn apparition of stars in the hydrogen region of the spectrum: a message from the future?
